WORK EXPERIENCE

Mobile Developer **Nov 2025 – Present**
Mycarehub *Remote*

I developed a multiplatform mobile app for support workers to view their schedules, accept bookings, and submit shift reports. Administrators manage bookings for support workers and NDIS participants, and review/manage submitted shift reports directly on mobile at their utmost convenience. Implemented background GPS tracking active during a shift as a safety tool, detect anomalies and help validate on-site shift details and timing.

WordPress Developer **Nov 2023 – Present**
Mycarehub *Remote*

I developed core business processes for an Australian NDIS Service Provider:
-Intake and Lead Management: Built a multi-step intake process for participants and support workers, fully integrated with a lead conversion system for referrals and client relationship tracking.
-Operations: Developed an internal management system handling user administration, NDIS plan tracking, service agreement renewals, payments, reports, document tracking and checklists.
-Scheduling: Created booking and shift management modules with recurrence, calendars, and location
-Automations and Messaging: Built automated PDF generation for shift reports, email/push notifications for reminders, and SEO.
-DevOps: Managed AWS server infrastructure for EC2 production and developer instances, scheduling automated backups, server upgrades, and security configurations.

WordPress Developer **May 2023 – Aug 2023**
Freelance *Remote*

I developed a matrix based multilevel marketing system integrated with an e-commerce storefront supported with modules such as login/registration, profiles, admin and user dashboards, store management, payments, email notifications, matrix management among others.

Lead Developer **Mar 2023 – Apr 2023**
Freelance *Remote*

I developed a website for an International Ophthalmologist symposium. Systems that I created include login/registration, doctor verification, email notifications, account management and profile, itinerary filter, speaker gallery, certificate generator, evaluation and feedback forms, and admin dashboards. I also maintained the website and used cPanel for backups and emails.

Web Developer Intern **Apr 2022 – Dec 2022**
Qadra Studio (Aug-Dec), JLCG (Apr-Jul) *Remote*

I created responsive web pages for WordPress websites using Elementor or Bricks guided by Figma Designs. Jetpack was utilized for custom post types and adding dynamic content.

WordPress Developer **Dec 2021 – Apr 2022**
Freelance *Remote*

I worked on different tasks mainly using WordPress, CSS, and Divi for building pages.

SKILLS

- **Skills:** HTML, CSS, JS, PHP, WordPress, APIs, Bootstrap, Firebase, MySQL, GCP, AWS, Azure, Vue.js

EDUCATION

FEU Alabang **2018 – 2022**
BS Information Technology with specialization in Web and Mobile Applications *Muntinlupa*

- graduated **summa cum laude**
